Answers:

1) Personal Information

- **Full name:** André Luiz Cardoso
- **Current location (city/country):** Luxembourg City / Ville de Luxembourg, Luxembourg
- **Professional title:** Data Analyst (Power BI / SQL / Python)
- **Type of position looking for:** Data Analyst / Business Intelligence / Analytics roles
- **Open to remote or on-site work:** Yes (you currently work remote at Zaori Capital)

2) Education

- **Educational background:** Postgraduate Specialization in Business Intelligence (BI); MBA in Tax Planning; Bachelor's in Law
- **Institution:** XP Educação (Postgraduate BI); ESAMC Business School (MBA + Law)
- **Relevant courses completed:** Postgraduate specialization in BI (specific modules not listed in the resume)
- **Certifications:** Not listed
- **Academic projects you're proud of:** BI/Data projects such as Sales & Customer Analysis Dashboard; People Analytics (turnover); Credit Scoring & Risk Mitigation

3) Technical Skills

- **Programming languages:** Python, SQL (plus C in 42 Luxembourg apprenticeship)
- **Frontend technologies:** Not a main focus in this resume (not listed as frontend stack)
- **Backend technologies:** SQL databases; (C backend components at 42 Luxembourg)
- **Tools:** Power BI (DAX, dashboards), Excel (Power Query, VBA), Git/GitHub, Jira; Agile (Scrum/Kanban)
- **Skill level (based on your statement):**

    - Power BI / SQL / Python / Excel: **Advanced** (core expertise stated)
    - Git/GitHub / Jira: **Intermediate** (used in project delivery)

4) Projects

- **Most important projects:**
    1. **Sales & Customer Analysis Dashboard — SQL Server + Power BI**
    2. **People Analytics – Reducing Employee Turnover**
    3. **Credit Scoring & Risk Mitigation in the Financial Market**
- **Role in each project:** Developed analyses/dashboards end-to-end (as described in project bullets)
- **Technologies used:** SQL Server, Power BI, Python (pandas/NumPy), Excel; CRISP-DM; correlation/IV/outlier detection methods
- **Challenges faced (supported by your CL focus):** ensuring data quality, profiling/validation, defining reliable metrics, and automating checks
- **Results achieved:** dashboards/models that reduced costs by ~30% and improved efficiency by ~15% (overall impact statement)

5) Professional Experience

- **Worked before? Where and role?**
    - Data Analyst & Tokenomics Research — Zaori Capital (Remote) Jun 2025–Present
    - Software Developer Apprentice — 42 Luxembourg Dec 2023–Present
    - Business Data Analyst (Tax Optimization) — Moreno & Guarim Law Firm Apr 2019–Nov 2022
- **Responsibilities:**
    - Tokenomics models, financial models/simulations, regulatory compliance analysis (MiCA, MiFID II)

    - C backend components (data structures, memory management, optimization)
    - Tax scenario modeling, dashboards/reports, due diligence/KYC/AML, risk scorecards

- **Achievements you're proud of:** reduced clients' tax burden up to 30%; improved efficiency (overall 15% claim); built dashboards and models with measurable impact

- **Teamwork / role in team:** experience collaborating under pressure and across different professional contexts.

6) Soft Skills

- **Handling deadlines:** used to structured delivery and working under pressure (Army/legal + agile routines)
- **Dealing with challenges/pressure:** solution-oriented, adapts quickly; comfortable with high-responsibility contexts

- **Working in a team:** collaborative, integrates easily; used to cross-team work and clear communication

- **Problem-solving example (safe, resume-based):** built tax scenario models/dashboards and risk scorecards to classify exposure and support decisions

7) Career Goals *(not explicitly written; aligned with your CL/resume)*

- **Short-term goals:** join a data-driven team as a Data Analyst/BI, delivering dashboards/datasets/automation and supporting reliable metrics
- **Long-term goals:** grow into senior analytics/BI roles with stronger ownership of data foundations (governance, documentation, metric definitions)

- **Preferred environment:** collaborative, data-driven, with clear processes and stakeholder alignment

- **Why tech roles:** you enjoy turning business needs into technical solutions and making data reliable and usable
