Resume Questionnaire — Tales Lima de Paula

Full-Stack Developer | React · Java · Blockchain | Luxembourg

1) Opening

1. **What role/area are you targeting?**
   Full-Stack Developer / Frontend Developer (React) / Junior Java Developer

   Focused on Blockchain, Fintech and Cybersecurity.

2. **Language of resume?**
   English

3. **Personal info you don't want to include?**
   Age, photo, full address — only Luxembourg as location.

2) Header & Links

4. **Full name and city/country?**
   Tales Lima de Paula — Hosinguen, Luxembourg

5. **Email and phone?**
   Not included in questionnaire (to be confirmed separately)

6. **Links?**
   GitHub: https://github.com/tales1982

   LinkedIn: https://www.linkedin.com/in/tales-lima-de-paula-900097242/

   Portfolio: https://tales-snowy.vercel.app/

3) Summary / Objective

7. **Who are you professionally and what are you looking for?**
   Junior Full-Stack Developer based in Luxembourg, focused on React, Java/Spring Boot and Blockchain. Currently studying Cybersecurity and building real production projects including a tokenization platform, digital certificate SaaS and multiple cloud-native applications deployed with Kubernetes. Passionate about Web3, DevOps and secure software development, seeking my first professional developer role to grow and contribute to real products.

8. **3 key strengths you want recruiters to remember?**
   - React + Modern Frontend
   - Java Spring Boot + APIs
   - DevOps / Blockchain / Security mindset

4) Education

9. **Degree/program, institution, dates?**
   Cybersecurity Technology Program — Unigran Europe, Brussels (Remote) — 2026–Present

42 Luxembourg — Software Engineering & Cybersecurity Track — 2024–Present

10. Relevant coursework?

- Network Security & Enumeration
- Linux & System Security
- Web Security (OWASP)
- Cryptography Fundamentals
- Networking (TCP/IP, scanning tools)

11. Any strong academic projects?

ft_transcendence — 42 School capstone project: Full-stack web platform for managing and completing tasks rewarded with ERC-20 tokens.

Built with React, Java Spring Boot, PostgreSQL and WebSocket for real-time features.

Focus on authentication, APIs, real-time interactions and token-based reward system.

12. Awards, scholarships, honors?

None to include.

5) Experience

13. Company/client, job title, dates, work mode?

Freelance Web Developer (Self-employed) — 2024–Present — Remote

14. Day-to-day responsibilities?

- Develop modern web applications using React + TypeScript
- Build backend APIs with Java Spring Boot
- Deploy applications using Docker & Kubernetes
- Manage cloud servers (Hetzner)
- Implement authentication and security best practices

15. Technologies/tools used?

React, Next.js, TypeScript, Java, Spring Boot, PostgreSQL, Docker, Kubernetes, GitHub Actions

16. Biggest delivery/impact?

Built and deployed multiple production-ready SaaS and Web3 projects. Manage full DevOps lifecycle from code to deployment.

17. Numbers/metrics?

Multiple production projects live and running. Full DevOps ownership across all projects.

18. Team/process (Scrum, Kanban, code reviews)?

Peer-learning environment at 42 Luxembourg — collaborative project solving and code reviews.

19. A difficult challenge you solved?

Integrating Java backend with Ethereum smart contracts using Web3j for the tokenization platform — required understanding contract deployment strategies and runtime interaction between Foundry and Java.

6) Projects

20–25. Zaori Capital — Tokenization Platform
URL: https://zaoricapital.com

Blockchain platform for tokenizing real-world assets.

Stack: React, Next.js, Java Spring Boot, PostgreSQL, Ethereum, Smart Contracts, Kubernetes

Features: Wallet integration (Web3), tokenized asset management, identity & compliance system, smart-contract integration.

Learned: Real production architecture, Web3 integration, DevOps and security.

20–25. Certificate Vault — Digital Certificate SaaS
URL: https://certificate-vault.com

SaaS platform to issue blockchain-verified certificates with QR validation.

Stack: React, Spring Boot, Blockchain, PostgreSQL, Docker, Kubernetes

Features: Issue & verify certificates, QR code validation, secure document storage, REST APIs.

20–25. Cybersecurity Lab / Ethical Hacking Journey
Personal lab focused on enumeration, network scanning and security.

Tools: Nmap, Netcat, Nikto, OpenSSL, Kali Linux, Metasploitable

Links: GitHub projects (available on request)

7) Skills

26. Programming languages?
Java, TypeScript / JavaScript, SQL, Bash

27. Frameworks/libraries?
React, Next.js, Redux Toolkit, Styled Components, Spring Boot

28. Tools?
Docker, Kubernetes, GitHub Actions, Linux servers, Git

29. Testing and best practices?
REST API testing, JWT/OAuth security practices, clean code principles

30. Databases, APIs, auth, cloud?
PostgreSQL, REST APIs, JWT / OAuth, Kubernetes (cloud-native deployments)

31. What are you learning right now?
Advanced cybersecurity, Smart contracts / Solidity, Cloud & Kubernetes

8) Soft Skills

32. Teamwork example?
Worked in the peer-learning environment at 42 School, solving projects collaboratively and performing code reviews.

33. Initiative/ownership example?
Created multiple full production projects independently and deployed them in the cloud without any guidance.

34. Communication example?
Write documentation, technical reports and explain technical concepts clearly across projects.

35. Handling deadlines/pressure example?
Managing multiple full-stack projects + cybersecurity studies + 42 school projects simultaneously.

9) Extras

36. Certifications/courses?
42 Luxembourg coursework (in progress), Unigran Cybersecurity program (in progress)

37. Languages?
Portuguese — Native | French — Professional | English — Intermediate

38. Hackathons, open-source, communities?
42 Luxembourg community, Cybersecurity learning communities

10) Top Achievements & Closing

39. Top 3 achievements?
- Built multiple production full-stack SaaS platforms live on the web
- Running Kubernetes infrastructure independently for personal projects
- Combining Blockchain + DevOps + Security skills in real production systems

40. Anything to exclude?
Age, photo, full address (city only: Luxembourg)

41. Spellings, dates, links confirmed?
All links confirmed working. Dates: 2024–Present for all active items.
